***Restriction/Election***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

***Species election:***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Instant claims are directed to

(i) compositions of hematopoietic growth factors, comprising patentably distinct growth factors such as EPO, G-CSF, IL-5, TPO, GM-CSF, IL-3, IL-6, IL-11, LIF, or FGF basic, and (ii) use of various second biopolymers in the compositions, the generic terms being saccharide-based, or cellulosic with specific polymers recited as methylcellulose, hydroxymethylcellulose, hydroxyethylcellulose, hydroxypropylcellulose, hydroxypropylmethylcellulose, carboxymethylcellulose, ethylhydroxyethylcellulose.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of a hematopoietic growth factor, and a second biopolymer for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1646

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Based on the above discussion, the inventions I-XII require non-cohesive searches, require different considerations and are patentably distinct. Having shown that these inventions are distinct for the reasons given above, they have acquired a separate status in the art shown by their different classification, and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has prima facie shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
